

## Session 8 Site selection

Session 8: Site Selection

1

## Learning Objectives

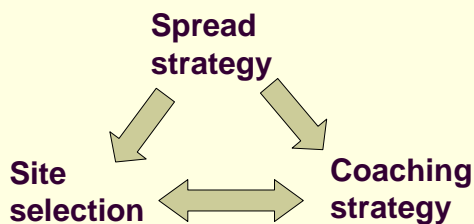

Participants will be able to discuss how to select the sites participating in the collaborative based on:

- the scope of improvement selected (i.e., national, regional, local; mix of public/private)
- whether spread is an eventual goal

Session 8: Site Selection

2

... an iterative process...

Session 8: Site Selection

3

What criteria could be used to select sites?

Session 8: Site Selection

4

Site selection

What criteria could be used to select sites?

- Need
- Factors increasing probability of success
- Factors that strengthen health system
- Representativeness

In what ways could you take these into account?

Session 8: Site Selection

5

Site selection

Exercise

What criteria would **you** recommend for selecting sites for the collaborative you will implement? Why?

- Need
- Factors increasing probability of success
- Factors that strengthen health system
- Representativeness (variety/homogeneity of sites)

Are there any categories you would not take into consideration?
